Application/ Control No.: 10/624,002 Examiner: GOLOBOY, James C

IN THE CLAIMS

Please amend the claims of the present application under the provisions of 37 C.F.R.\$1.121(c), as indicated below:

1. (Previously presented): A nitrite free grease composition for avoiding an abnormal peeling of a rolling surface of a bearing, said nitrite free grease comprising:

a base oil,

a thickener, and

an additive,

wherein the base oil contains 20% by weight or more of alkyldiphenyl ether oil and does not contain ester oil in the base oil, and has a kinetic viscosity of 20 to 150 mm²/s at 40 degree° C, and wherein the thickener is an aromatic diurea compound represented by the following formula (2)

where R_2 and R_4 are the same or different, and represent each an aromatic hydrocarbon group having 6 to 15 carbon atoms, and R_3 represents an aromatic hydrocarbon group having 6 to 15 carbon atoms, and is contained in an amount of 5 to 30% by weight based on the total amount of the base oil and the thickener, and wherein the additive contains as an essential component 0.05 to 5 parts by weight of a sodium sebacate based on 100 parts by weight of the base oil and the thickener.

Application/ Control No.: 10/624,002 Examiner: GOLOBOY, James C

- 2. (Canceled)
- 3. (Previously presented): The grease composition as claimed in claim 1, wherein the base oil contains synthesized hydrocarbon oil.

4-6 (Canceled)

7. (Previously presented): The grease composition as claimed in claim 1, wherein each of the R_2 and R_4 is $C_6H_4\,(CH_3)\,,$ and the R_3 is $-C_6H_4CH_2C_4H_4-$.

8-10 (Canceled)

- 11. (Previously presented): The grease composition as claimed in claim 1, wherein the additive comprises 0.05 to 5 parts by weight of an antioxidant in addition to sodium sebacate based on 100 parts by weight of the base oil and the thickener.
- 12. (Previously presented): The grease composition as claimed in claim 11, wherein the antioxidant is selected from the group consisting of a sulfur-containing antioxidant, a phenol-based antioxidant and an amine-based antioxidant.
- 13. (Original): A grease composition sealed bearing, in which a sliding part of the bearing is sealed with the grease as claimed in claim 1.
- 14. (Previously presented): A nitrite free grease composition for avoiding an abnormal peeling of a rolling surface of a bearing, said nitrite free grease consisting essentially of:

Application/ Control No.: 10/624,002 Examiner: GOLOBOY, James C

a base oil,
a thickener, and
an Additive,

wherein the base oil consists of alkyldiphenyl ether oil, and has a kinetic viscosity of 20 to 150 mm2/s at 40°C, and wherein the thickener is an aromatic diurea compound represented by the following formula (2)

$$\begin{array}{ccc} \mathbf{O} & \mathbf{O} \\ \parallel & \parallel \\ \mathbf{R}_2 - \mathbf{NHCNH} - \mathbf{R}_3 - \mathbf{NHCNH} - \mathbf{R}_4 \end{array} \tag{2}$$

where R2 and R4 are the same or different, and represent each an aromatic hydrocarbon group having 6 to 15 carbon atoms, and R3 represents an aromatic hydrocarbon group having 6 to 15 carbon atoms and is contained in an amount of 5% to 30% by weight based on the total amount of the base oil and the thickener,

wherein the additive contains as an essential component 0.05 to 5 parts by weight of a sodium sebacate_based on 100 parts by weight of the base oil and the thickener,

wherein the antioxidant is selected from the group consisting of a sulfur-containing antioxidant, a phenol-based antioxidant and an amine-based antioxidant.

- 15. (Previously presented): A nitrite free grease composition for avoiding an abnormal peeling of a rolling surface of a bearing, said nitrite free grease consisting essentially of:
 - a base oil,
 - a thickener, and
 - an additive,

Application/ Control No.: 10/624,002 Examiner: GOLOBOY, James C

wherein the base oil consists of 80% by weight of alkyldiphenyl ether oil and 20% by weight of synthesized hydrocarbon oil, and has a kinetic viscosity of 20 to 150 $\,\mathrm{mm}^2/\mathrm{s}$ at 40°C,

wherein the thickener is an aromatic diurea compound represented by the following formula (2)

O O
$$R_{2}$$
—NHCNH— R_{3} —NHCNH— R_{4} (2)

where R2 and R4 are the same or different, and represent each an aromatic hydrocarbon group having 6 to 15 carbon atoms, and R3 represents an aromatic hydrocarbon group having 6 to 15 carbon atoms and is contained in an amount of 5% to 30% by weight based on the total amount of the base oil and the thickener,

wherein the additive contains as an essential component 0.05 to 5 parts by weight of a sodium sebacate based on 100 parts by weight of the base oil and the thickener,

wherein the antioxidant is selected from the group consisting of a sulfur-containing antioxidant, a phenol-based antioxidant and an amine-based antioxidant.
